Professional Summary

AI-Powered Full-Stack Web Developer with 6+ years of experience designing, building, and maintaining scalable web and mobile applications. Experienced across the entire development lifecycle, from architecture and backend APIs to modern frontend interfaces and deployment. Skilled in integrating Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), local AI deployments with Ollama, and AI-powered automation into real-world products. Passionate about building fast, maintainable software that combines excellent user experience with practical AI capabilities.

Technical Skills & Development Tools

- Programming Languages: PHP, JavaScript, TypeScript, Python, SQL, HTML5, CSS3
- Frontend: React, Next.js, Vue.js, AngularJS, React Native, Tailwind CSS, Bootstrap, jQuery
- Backend: Laravel, Node.js, Express.js, CodeIgniter, REST APIs, WebSockets
- Databases: PostgreSQL, MySQL
- DevOps & Tools: Git, GitHub, Docker, npm, Yarn, Bitbucket
- AI Technologies: Large Language Models (LLMs), Ollama, Retrieval-Augmented Generation (RAG), Fine-Tuning, Embeddings, Hugging Face, Prompt Engineering, Local AI Deployment, AI API Integration

Projects and Portfolio

Personal Portfolio

www.halim-djenaoucine.co.uk

React - TypeScript - AI

Designed and built a modern portfolio showcasing AI integrations, full-stack projects, and intelligent application development.

Runway Travel

<https://runway-travel.com>

Laravel - PHP - PostgreSQL - JavaScript

Designed and developed a full-featured travel booking platform featuring customer and admin dashboards, dynamic holiday packages, flight and hotel bookings, and scalable backend architecture.

Diary App

dairy-7ox8.onrender.com

Next.js - React - Node.js - AI

Built an AI-powered journaling application supporting text and voice entries. Implemented automatic speech transcription using AI and developed a modern full-stack architecture with Next.js and Express.

Gooki Marketplace

<https://djenahalim.github.io/gooki-demo>

React Native - Node.js

Created a cross-platform marketplace where users can launch their own digital storefronts. Developed both the mobile application and backend API.

AI Snake Trainer

<https://youtu.be/7QTTMGu5uhY>

Python - Reinforcement Learning

Built an AI agent capable of learning to play Snake through reinforcement learning, demonstrating neural network training and autonomous decision-making.

Key Achievements

- **Redesigned and optimized the company website**, reducing page load times by 40% and improving the user experience, which led to increased client engagement.
- **Developed and maintained multiple custom Laravel/Vue.js applications**, enhancing performance and scalability for long-term use.
- **Integrated multiple third-party APIs (e.g., Stripe, SendGrid, Twilio)** to expand app capabilities and automate communication.
- **Improved mobile responsiveness and cross-browser compatibility** across multiple company platforms, leading to a 25% increase in mobile user retention.
- **Built AI-powered features using local LLMs**, RAG pipelines, and AI APIs.
- **Delivered more than 20 full-stack web and mobile applications** from concept to production using Laravel, React, React Native, Node.js, and AI technologies.

Professional Experience

Web Developer & AI Engineer

Time Etc

03/2023 - Present | Birmingham, West Midlands

- Design, develop, and maintain full-stack web applications using Laravel, React, Node.js, and modern JavaScript frameworks.
- Build responsive web and mobile applications with a focus on performance and usability.
- Architect backend APIs and integrate third-party services.
- Deploy and manage local AI solutions using Ollama and open-source LLMs.
- Design Retrieval-Augmented Generation (RAG) pipelines for intelligent document retrieval.
- Integrate AI features into internal business workflows to improve productivity.
- Maintain legacy applications while introducing modern development practices.
- Collaborate closely with designers and stakeholders to deliver production-ready solutions.

Web Developer

WRP Timber Mouldings

03/2020 - 02/2023 | Newport, Essex

- Developed and maintained the company's web platform using PHP, JavaScript, Laravel, and SQL.
- Added new features while improving performance and usability.
- Integrated external APIs and business plugins.
- Built responsive interfaces for desktop and mobile devices.
- Provided technical support for software and hardware across the business.
- Worked directly with stakeholders to translate business requirements into technical solutions.

Education et certifications

- LLM Engineering, RAG & AI Agents: Udemy (2025)
- Large Language Models Course: Hugging Face (2025)
- CIW Web Development Professional: The Training Room (2020)
- Bachelor's Degree in Applied Mathematics: University of Bejaia (2013)

Personal interests

- Coding and software development
- Mobile application design and development
- Artificial intelligence training and experimentation
- Web and full-stack application development
- Electronic device repair (phones, tablets, laptops, and PCs)
- Hardware and software diagnostics and troubleshooting

Languages

- Arabic: Native
- English: Fluent
- French: Fluent
